

The newest generation of state-of-the-art Computerized Electrodermal Screening

What is VITAL™ Technology?

Computerized ElectroDermal Stress Analysis is the end-product of a 50-year evolution in Biological-Energetic/Biofeedback testing. The computer measures the degree of electrical resistance of the acupuncture points, generally the hands and feet. These measurements indicate the balances or imbalances, of the various organs, systems and glands, and can detect low-level reactions in the body. It also indicates which nutritional or homeopathic remedy and the exact potency that will bring about an energy balance. While being tested there are no side effects, discomforts or piercing of the skin.

Introducing Vital

Standard Enzyme Company provides training and certification in the VITAL™ Technology that will give you the knowledge and hands-on skills to really make a difference with your clients. The software is designed through a step-by-step program to screen for viruses, bacteria, parasites, subluxations, and even stress and emotional interferences. Thus it supplies you with the most advanced natural healthcare technology available.

Where Did This Technology Come From?

The use of *Electrodermal Testing* dates back to the early 1950's to a German medical doctor named Reinhold Voll. He developed the first electronic testing device for finding acupuncture points. He then devoted his life to identifying correlations between disease states and changes in the electrical resistance of the various acupuncture points. For example, he found that patients with lung disease had abnormal readings relating to the lungs. This allowed acupuncture points to be used diagnostically (until Voll, they had only been used as treatment). In more recent years researchers from UCLA and USC have verified Dr. Voll's findings with

double-blind studies, and found there was 87 percent accuracy between Voll's electronic testing device and the result of the x-ray diagnosis. Due to Voll's lifelong research we are now able to incorporate acupuncture with remedies and technology.

Move Up to The Most Advanced Computerized Electrodermal Screening System Available on The Market Today

Why *this* system?

James Hawver N.M.D., founder of Standard Enzyme Company, became frustrated with software systems that only addressed symptoms. He decided to work on development of a more comprehensive system instead. This system would be designed to identify the *root* cause of the client's health concern. It was quiet revolutionary.

The first generation of software was the Computerized ElectroDermal Stress Analysis (CED-SA), which has been effectively used by many physicians, naturopaths and health care providers for more than a decade.

Just as Microsoft and Apple routinely release new versions of their software with the newest technology available...the CEDSA system has recently been updated. With ongoing research and development the **VITAL™ Software System**, was created to be a more dynamic generation of software or "smart software." It will be updated continuously with the newest strains of viruses, bacteria, and products to make it a dynamic, integrative tool for health care practitioners. **VITAL™** is built with the latest technology using .net and C#, it works with Windows XP (systems 7 and 8), as well as Apple's MAC (Bootcamp). It is a secure and expandable database using SQL technology. Due to this vastly improved platform, the **VITAL™ System's** development and research team will make constant updates and improvements (available to you at regular intervals) to ultimately provide you with better screening capability.

James Hawver, NMD

With an established history in software design you have the security of an experienced team that supports you as a technician.

With the introduction of the new **VITAL™ System Software** you have a system that is affordable, extremely effective, requires minimal training, and allows you to greatly improve your client's health and quality of life. For these reasons it becomes an ideal opportunity for persons who would like to enter into the healthcare industry.

In working with children with ADD and autism tests, the patterns found showed these children and these same children exhibited extreme difference in the treatment of these cases. I administer to sensitive children. After only Complex, and Candidiasis, significant changes am very pleased to be using these products.
-Jo Queta Hayes, M.S., C.C.C., N.D., San

Powerful Reports

Print out your information using our well designed and customizable reports

Easy Step-by-Step Screening

The program is designed to step the user through the screening protocol automatically. This simplifies use and ensures a comprehensive assessment.

Easy to Use Reports Interface

All printable data files for the client appear on one customizable screen, allowing you to

make your selections and print in one easy step.

Updatable and Upgradable

The VITAL™ Software is here to stay. The present system already contains an archive of thousands of products, known issues, organs and systems as well as enhanced graphics and videos. This content is constantly being updated and made available to you at no additional charge to the existing Vital Software version. The software is also upgradable automatically via the internet and has enhanced reporting features.

Requirements to operate this software are:

At this time we recommend the Dell E6530, or XPS 15 (Windows 7 or 8 Pro operating system). The system is also MAC compatible but will require Windows 7 or 8 (run under Boot Camp).

- 2.0 GHz Quad Core or better (i.e. i5 or i7 processors)
- 4 GB of Ram or better (8 or more preferred)
- 1920 x 1080 Screen Resolution is the ideal (software will also run adequately on smaller screens)
- Wireless and Bluetooth capability (for updates and future enhancements)
- Hard Drive-Minimum of 128 GB (500 GB preferred, 7200 rpm; highbred drive optional)

Standard Enzyme Company offers a standard laptop option. Please ask for details.

ism, I use CRA, blood and urine analysis, and Live Cell to assess nutritional status. From these children to have high yeast levels, increased amounts of red crystals, protein linkage, and liver toxicity, the defensiveness to texture, smell, and taste. Standard Enzyme products have made a significant difference. Your detoxifiers and drainers are tasteless and colorless; therefore, they are easy for parents to use. After two months of detoxification using varied products like Hydrangea-Plus, Kidney/Bladder, Universal Drainage were seen on Live Cell testing, as well as a significant decrease in liver toxicity and yeast. I am very satisfied in my practice and thrilled with the significant results I have seen in this short period of time."
Santa Ana, CA

The \$18,995 (USD) Price Includes:

- (1) VITAL™ Software Testing Unit
- (1) VITAL™ Software Download
- (2) Days of Hands-On Training
- (2) Bio-Feedback Unit (CSA or VT-1000)
- (6) Days of Certification Training
- (1) Year of Technical Support (Technical Support & Software Upgrades will be renewable on a yearly basis)

Add a system compatible custom laptop for \$2,200. We do not provide product support for any laptop computer that has not been previously approved through our technical support team.

Terms: A \$5000 non-refundable fee will apply.

The Top Rated VITAL™ Technician Certification Course is Included in the Software Price

Standard Enzyme Company offers VITAL™ Technician Certification Courses in two increments—Level 1-2 and Level 3-4. They are generally held a month apart. Upon completion of Level 4 training, a final certification exam will be given covering the information from all sessions. The VITAL™ Technician Certification Course schedule is as follows:

Level 1

Intro to EDS (ElectroDermal Screening), Basic Hand and Foot Points, Testing (Preliminaries, Balancing, and Summary), Hands-on training on VITAL™ equipment.

Level 2

Principles of Acupuncture (EDS), Anatomy and Physiology, Clinical Appraisal Form (Health Questionnaire), (Chemical and pesticide toxicity, nosodes), Homeopathy, Herbology, and Vitamins and Minerals.

Level 3

Advanced Acupuncture Points, Organ

System Correlations, Homotoxicology, Miasm Therapy, Correlations of Emotional and Physical Health.

Level 4

Specific for Emotional Disorders: A Traditional Approach to Psychotherapy, and Emotional Release Techniques.

Business Builders Assistance

Additionally, you are eligible for a Business Builders Assistance Consultation.

This detailed meeting, with SEC/BHC General Manager and AONH Founder and President, Sam Abuikittah, will help you to focus and build your business model.
